

Our Leak Detection & Repair Commitment

Water leaks are notoriously complex, and identifying every entry point often requires a systematic, multi-stage approach. We pride ourselves on our persistence and transparency throughout this process.

Our Core Guarantees:

- **Successful Detection:** We guarantee to identify at least one source of water ingress during your initial detection service.
- **Workmanship:** All leak-related repairs are backed by a **1-year guarantee**.
- **Quality Parts:** Any replacement components fitted by our team carry a **3-year fault warranty**.

Still Seeing Water? If a leak persists, bring your vehicle back to us. We will perform a comprehensive re-inspection. If the issue stems from our previous workmanship or a faulty part, we will resolve it **free of charge**. Note that in some cases, a primary leak must be sealed before secondary or intermittent leaks become detectable.
